

Free Physiotherapy Health Camp at Haily Mandi, Jatauli, Haryana

Faculty of Physiotherapy organised a Physiotherapy Camp on Tuesday, March 29th, 2022 at Haily Mandi, Jatauli, as a small gesture to give back to the community. Under the direction of Dr. Sajjan Pal (Assistant Professor) and Dr. Aditi Sharma, the camp was organised by a group of passionate graduates and postgraduate physiotherapy students (Assistant Professor). A total of 70 people were counselled, including both youngsters and adults. The camp's response surpassed all expectations. All patients were given a complete evaluation, which included blood sugar and blood pressure analysis, as well as physiotherapy services, which included exercise prescription, posture correction guidance, and modalities as needed. Where necessary, patients were also encouraged to seek treatment at the SGT Medical College, Hospital, and Research Institute. The camp's major goal was to raise awareness about the benefits of physiotherapy treatment in preventing and treating a variety of diseases. People were sent home with the message that while medications may heal the majority of their issues, exercise will improve their quality of life.

Altogether, the camp served as an inspiration to teachers and students in favor of putting their abilities to good use for the greater good.
